

MADISON CORPORATE BOND LADDER 1-3 YEAR

March 31, 2026 | Separately Managed Account Performance & Characteristics

Portfolio Characteristics may help you understand how the portfolio, taken as a whole, is situated relative to other portfolios or the benchmark. See the Definitions section on the following page for more details about each metric presented below.

Investment Principles

- Provides a steady stream of income.
- Investment grade rated bonds; no derivatives.
- Transparency of holdings that typically target issuances of \$500 million or more.
- Leverages Madison’s dedicated credit research process, internal credit ratings, and proprietary Corporate Bond Spread analysis.

Investment Process & Philosophy

Madison’s Corporate Bond Ladders are constructed by purchasing a series of investment grade corporate bond issues with staggered maturities. The illustration below demonstrates that as bonds mature, the proceeds are reinvested to purchase new issues at the longer-end of the maturity structure. If interest rates rise, the ladders allow for clients to gain higher yields with reinvestment of maturing securities.

Madison’s ladder portfolios are constructed by a combination of top-down macroeconomic outlook, sector valuation and in-depth credit analysis by our highly experienced team. We only purchase investment grade bonds from quality companies and each issuer is selected with an eye towards liquidity. All portfolios are fully transparent; clients can see their exact holdings.

Madison monitors the credit of all bonds in the ladder portfolio and evaluates possible transactions in the event of a bond’s credit deterioration. As a result, Madison’s higher quality bias and sector screening play an important role in potentially mitigating occurrences of credit deterioration and untimely transactions in the portfolio.

DISCLOSURES & DEFINITIONS

1. Information is based on a model portfolio which is intended to provide a general illustration of the investment strategy. Individual client portfolios in the program may vary.
2. This measure is not the result of an assessment of the credit quality of the composite's portfolio by a Nationally Recognized Statistical Rating Agency ("NRSRO") or any other independent entity.
3. Credit quality ratings on underlying securities of the composite are received from one or more NRSRO (e.g., S&P, Moody's, Fitch, etc.) and converted to the equivalent major rating category commonly utilized by more than one NRSRO. The quality ratings are calculated by Madison and in the event of split ratings among the NRSROs, the highest rating is used. Ratings and portfolio credit quality may change over time. Portfolio distributions are rounded to the nearest 0.1%.

All or some of the information presented is "supplemental information" and is included as part of the GIPS® Report for the 1-3 Year Corporate Bond Ladder Composite on the reverse side, which must be included with this material. References to "Madison" are of a sample portfolio which represents hypothetical information based on a Madison model and does not reflect information of an account in the composite. It is not intended to reflect information of any individual account, and is presented for illustrative purposes only. Holdings may vary depending on account inception date, objective and other variables, including changes made to the model by the Advisor and sponsor. Past performance is no guarantee of future results. Individual client accounts may vary depending on time of investment. GIPS® is a registered trademark of CFA Institute. CFA Institute does not endorse or promote this organization, nor does it warrant the accuracy or quality of the content contained herein.

Risk:

All investing involves risks including the possible risk of principal. There can be no assurance the portfolios will achieve their investment objectives. In addition to the ongoing market risk applicable to portfolio securities, bonds are subject to interest rate risk. When interest rates rise, bond prices fall; generally, the longer a bond's maturity, the more sensitive it is to this risk. There may be less opportunity for price appreciation in a low interest rate environment. Bonds may also be subject to call risk, which allows the issuer to retain the right to redeem the debt, fully or partially, before the scheduled maturity date. Proceeds from sales prior to maturity may be more or less than originally invested due to changes in market conditions or changes in the credit quality of the issuer.

Please consult with your financial advisor to determine your risk tolerance and investment objectives.

It should not be assumed that recommendations made in the future will be profitable or will equal the performance of the securities in this list.

Holdings may vary depending on account inception date, objective, cash flows, market volatility, and other variables. Any securities identified and described herein do not represent all of the securities purchased or sold, and these securities may not be purchased for a new account. There is no guarantee that any securities transactions identified and described herein were, or will be profitable. Any securities identified and described herein are not a recommendation to buy or sell, and is not a solicitation for brokerage services.

Upon request, Madison may furnish to the client or institution a list of all security recommendations made within the past year.

Definitions:

Effective Duration: a measure of a portfolio's interest-rate sensitivity. The longer a portfolio's duration, the more sensitive the portfolio is to shifts in interest rates.

Weighted Average Maturity: computed by weighting the maturity of each security in the portfolio by the market value of the security, then averaging these weighted figures.

Weighted Average Quality: see footnotes 2 & 3 above.

Yield to Worst the lowest potential yield that can be received on a bond without the issuer actually defaulting. The yield to worst is calculated by making worst case scenario assumptions on the issue by calculating the returns that would be received if provisions, including prepayment, call or sinking fund, are used by the issuer.

Average Coupon: a fixed-income security's coupon rate is the annual coupon payments paid by the issuer relative to the bond's face or par value.

"Madison" and/or "Madison Investments" is the unifying tradename of Madison Investment Holdings, Inc., Madison Asset Management, LLC ("MAM"), and Madison Investment Advisors, LLC ("MIA"). MAM and MIA are registered as investment advisers with the U.S. Securities and Exchange Commission. Madison Funds are distributed by MFD Distributor, LLC. MFD Distributor, LLC is registered with the U.S. Securities and Exchange Commission as a broker-dealer and is a member firm of the Financial Industry Regulatory Authority. The home office for each firm listed above is 550 Science Drive, Madison, WI 53711. Madison's toll-free number is 800-767-0300.

Any performance data shown represents past performance. Past performance is no guarantee of future results.

Non-deposit investment products are not federally insured, involve investment risk, may lose value and are not obligations of, or guaranteed by, any financial institution. Investment returns and principal value will fluctuate.

This report is for informational purposes only and is not intended as an offer or solicitation with respect to the purchase or sale of any security and is not investment advice.

+Preliminary

N/A - Information is not statistically meaningful due to an insufficient number of portfolios in the composite for the entire year.

As of December 31, 2025, total assets under advisement in all corporate bond ladder strategies, (1-3 Year, 1-5 Year and 1-10 Year), are \$1,300 million encompassing bundled fee accounts, non-bundled fee accounts and non-discretionary accounts which include \$884 million in model-traded assets. This is presented as supplemental information.

1-3 Year Corporate Bond Ladder Composite contains fully discretionary corporate bond non-bundled and bundled fee accounts. The strategy is focused on high quality security selection and designed to be a buy and hold strategy with continual credit monitoring and analysis. The principal objectives are preservation of invested capital and to provide a steady income stream derived from a laddered portfolio consisting of investment-grade bonds issued by United States corporations that have a maturity of 3 years or less. Effective May 1, 2022, the composite was redefined to narrow the definition of investable bonds to be high quality. From March 1, 2017 to April 30, 2022, the composite was defined to reflect the industry standard practice referring to the overall quality of the portfolio as an average quality of investment-grade. Prior to March 1, 2017, the composite definition stated that a laddered portfolio should consist of investment-grade bonds issued by United States corporations that have a maturity of 3 years or less. The principal risks of investing in the portfolio include: interest rate risk, call risk, risk of default and liquidity risk. As interest rates rise, the prices of bonds fall. Long-term bonds are more exposed to interest-rate risk than short-term bonds. Unlike bonds, bond portfolios have ongoing fees and expenses. In a low-interest environment, there may be less opportunity for price appreciation. Effective December 18, 2017, for illustrative purposes, the composite is compared to the ICE BofA 1-3 Year US Treasury TR Index (Index) which is an unmanaged index that tracks the performance of US Treasury securities with a maturity of 1-3 years. Prior to December 18, 2017, these two benchmarks were presented for illustrative purposes: the Bloomberg US Corporate 1-3 Yr (A or better) Index (Index1) which measures the universe of US dollar denominated corporate debt with an A or better rating and a maturity of 3 years or less; and the ICE BofA US 3-Month Treasury Bill Index (Index2) which measures the performance of a single issue maturing close to (but not beyond) three months which is incorporated into the index at the beginning of the month and held for a full month. The presented indices were changed retroactively because the current index is a more appropriate representation of the strategy as it captures its focus on total return and a specific maturity horizon. The former benchmarks were provided to disclose market conditions during the periods and were as follows: 2016 – Index1=1.88% & Index2=0.33%; 2015 – Index1=1.20% & Index2=0.05%; 2014 (10/1-12/31) – Index1=0.20% & Index2=0.00%. The composite does not manage to, and does not have the goal of outperforming, a benchmark, as the use of relative performance criteria is not applicable for laddered portfolios. Effective September 1, 2022, the composite was redefined to begin including both non-bundled and bundled fee accounts.

For the purposes of GIPS compliance and the determination of total assets under management, the Firm is defined as Madison. Madison represents Madison Investment Advisors, LLC ("MIA") and Madison Asset Management, LLC ("MAM"), two investment advisers under common control registered with the U.S. Securities and Exchange Commission pursuant to the Investment Advisers Act of 1940. (Registration does not imply a certain level of skill or training.) Prior to December 1, 2010, the Firm's composites were maintained by Madison Investment Advisors, Inc. ("MIA Inc."). On November 30, 2010, pursuant to a corporate reorganization that involved no change of control or personnel relating to account composite management, all composite accounts managed by MIA Inc. were transferred to MIA and performance information for periods prior to December 1, 2010 refer to this composite as managed by MIA Inc. During the first quarter of 2013, MIA and its parent company, MAM (also a registered investment adviser), began the process of eliminating the distinction between accounts and products managed by the two companies. Because MIA and MAM share all resources and personnel at their mutual Wisconsin office location and because there is no longer a brand or line of business distinction between products and services offered by the two registered investment advisers, for periods after March 31, 2013, the collective definition of the firm (Madison) includes accounts and assets managed by MAM and MIA. However, the firm does not claim compliance with the GIPS standards for assets and accounts managed by MAM prior to April 1, 2013. As of December 31, 2013, Madison Scottsdale, LC ("Scottsdale"), another registered investment adviser under common control with MIA, merged its assets into, and became part of, MIA and subsequently those assets became part of the firm (Madison). The transaction resulted in no change to the resources or personnel as the sole purpose of this change was to simplify Madison's legal corporate structure. Prior to January 1, 2014, Scottsdale did not claim GIPS compliance and no performance for composites formally maintained by Scottsdale are contained in this performance presentation or included in the definition of the firm (Madison). As of October 30, 2020, Hansberger Growth Investors, LP ("HGI LP"), an affiliated registered investment adviser under common control with MIA, consolidated its assets into MIA, and subsequently those assets became part of the firm (Madison). The transaction resulted in no change to the resources or personnel as the sole purpose of this change was to simplify the legal corporate structure. Prior to October 30, 2020, HGI LP claimed GIPS® compliance and all composite accounts managed by HGI LP were transferred to MIA and performance information for periods prior to October 30, 2020 refer to those composites as managed by HGI LP. On June 11, 2021, Madison acquired the fixed income management assets of Reinhart Partners, Inc. ("Reinhart"), an unaffiliated registered investment adviser, and subsequently those assets became part of the firm (Madison). The Investment Team of Reinhart, who were responsible for composite performance prior to June 11, 2021, joined Madison on that date and continue to manage the Reinhart Fixed Income Strategies. A list of composite descriptions and a list of broad distribution pooled funds are available upon request.

Madison claims compliance with the Global Investment Performance Standards (GIPS®) and has prepared and presented this report in compliance with the GIPS standards. The firm, as defined above, has been independently verified for the periods January 1, 1991 through December 31, 2025. A copy of the verification report is available upon request. A firm that claims compliance with the GIPS standards must establish policies and procedures for complying with all the applicable requirements of the GIPS standards. Verification provides assurance on whether the firm's policies and procedures related to composite and pooled fund maintenance, as well as the calculation, presentation, and distribution of performance, have been designed in compliance with the GIPS standards and have been implemented on a firm-wide basis. Verification does not provide assurance on the accuracy of any specific performance report. GIPS® is a registered trademark of CFA Institute. CFA Institute does not endorse or promote this organization, nor does it warrant the accuracy or quality of the content contained herein.

Results are based on fully discretionary accounts under management, including those accounts no longer with the firm. Composite policy requires the temporary removal of any portfolio incurring a client-initiated significant cash inflow or outflow of greater than 75% of portfolio assets for the period. Past performance is not indicative of future results.

The U.S. Dollar is the currency used to express performance. Time-weighted returns are presented gross and net of management fees and include the reinvestment of all income. For non-bundled fee accounts, the gross returns are stated gross of all fees and have been reduced by transaction costs. For bundled fee accounts, pure gross returns are shown as supplemental information and are stated gross of all fees and have not been reduced by transaction costs. Net returns are reduced by three separate annual model fees. The first net return is reduced by an annual non-bundled model fee which represents the standard fee: 0.20%, applied quarterly for periods prior to January 1, 2022 and applied monthly for periods beginning January 1, 2022. The second and third net returns are reduced by two annual bundled model fees of 1.25% and 3.00%, applied quarterly for periods prior to January 1, 2022 and applied monthly for periods beginning January 1, 2022. Due to variances between wrap/UMA programs, multiple net returns are presented to show three possible outcomes at different total annual fee rates. Bundled fees include Madison's portfolio management fee, as well as all charges for trading costs, custody, other administrative fees and any third-party manager fees. Bundled fee accounts made up 0% of the composite for all periods shown prior to September 1, 2022. Actual returns may vary depending on a particular account's trading platform and trading discretion. Any differences in the timing of trades may result in various performance outcomes for Madison's separately managed accounts versus model manager accounts. Actual returns will be reduced by investment advisory fees and other expenses that may be incurred in the management of the account. The collection of fees produces a compounding effect on the total rate of return net of management fees. As an example, the effect of investment management fees on the total value of a client's portfolio assuming (a) quarterly fee assessment, (b) \$1,000,000 investment, (c) portfolio return of 8% a year, and (d) 1.00% annual investment advisory fee would be \$10,416 in the first year, and cumulative effects of \$59,816 over five years and \$143,430 over ten years. The annual composite dispersion presented is an equal-weighted standard deviation calculated using the annual gross returns of the accounts in the composite for the entire year. The three-year annualized ex-post standard deviation of both the composite (using monthly gross returns) and the benchmark are required to be presented for year-end periods beginning in 2011. Policies for valuing investments, calculating performance, and preparing GIPS Reports are available upon request.

The management fee schedule is as follows: 0.20% annually on all assets. Total annual bundled fees charged by wrap/UMA sponsors familiar to Madison are generally in the range of 1.00% to 3.00% annually. Bundled fee schedules are provided by independent wrap/UMA program sponsors and are available upon request from the respective wrap/UMA sponsor. Actual investment advisory fees incurred by clients may vary. Additional information regarding investment advisory fees are described in our disclosure brochure.

The 1-3 Year Corporate Bond Ladder Composite was created October 1, 2014, and the inception date is October 1, 2014.

+Preliminary

N/A - Information is not statistically meaningful due to an insufficient number of portfolios in the composite for the entire year.

As of December 31, 2025, total assets under advisement in all corporate bond ladder strategies, (1-3 Year, 1-5 Year and 1-10 Year), are \$1,300 million encompassing bundled fee accounts, non-bundled fee accounts and non-discretionary accounts which include \$884 million in model-traded assets. This is presented as supplemental information.

1-5 Year Corporate Bond Ladder Composite contains fully discretionary corporate bond non-bundled and bundled fee accounts. The strategy is focused on high quality security selection and designed to be a buy and hold strategy with continual credit monitoring and analysis. The principal objectives are preservation of invested capital and to provide a steady income stream derived from a laddered portfolio consisting of investment-grade bonds issued by United States corporations that have a maturity of 5 years or less. Effective May 1, 2022, the composite was redefined to narrow the definition of investable bonds to be high quality. From March 1, 2017 to April 30, 2022, the composite was defined to reflect the industry standard practice referring to the overall quality of the portfolio as an average quality of investment-grade. Prior to March 1, 2017, the composite definition stated that a laddered portfolio should consist of investment-grade bonds issued by United States corporations that have a maturity of 5 years or less. The principal risks of investing in the portfolio include: interest rate risk, call risk, risk of default and liquidity risk. As interest rates rise, the prices of bonds fall. Long-term bonds are more exposed to interest-rate risk than short-term bonds. Unlike bonds, bond portfolios have ongoing fees and expenses. In a low-interest environment, there may be less opportunity for price appreciation. Effective December 18, 2017, for illustrative purposes, the composite is compared to the ICE BofA 1-5 Year US Treasury TR Index (Index) which is an unmanaged index that tracks the performance of US Treasury securities with a maturity of 1-5 years. Prior to December 18, 2017, these two benchmarks were presented for illustrative purposes: the Bloomberg US Corporate 1-5 Yr (A or higher) Index (Index1) which measures the universe of US dollar denominated corporate debt with an A or better rating and a maturity of 5 years or less; and the ICE BofA US 3-Month Treasury Bill Index (Index2) which measures the performance of a single issue maturing close to (but not beyond) three months which is incorporated into the index at the beginning of the month and held for a full month. The presented indices were changed retroactively because the current index is a more appropriate representation of the strategy as it captures its focus on total return and a specific maturity horizon. The former benchmarks were provided to disclose market conditions during the periods and were as follows: 2016 - Index1=2.18% & Index2=0.33%; 2015 - Index1=1.49% & Index2=0.05% 2014 (10/1-12/31) - Index1=0.52% & Index2=0.00%. The composite does not manage to, and does not have the goal of outperforming, a benchmark, as the use of relative performance criteria is not applicable for laddered portfolios. Effective September 1, 2022, the composite was redefined to begin including both non-bundled and bundled fee accounts.

For the purposes of GIPS compliance and the determination of total assets under management, the Firm is defined as Madison. Madison represents Madison Investment Advisors, LLC ("MIA") and Madison Asset Management, LLC ("MAM"), two investment advisers under common control registered with the U.S. Securities and Exchange Commission pursuant to the Investment Advisers Act of 1940. (Registration does not imply a certain level of skill or training.) Prior to December 1, 2010, the Firm's composites were maintained by Madison Investment Advisors, Inc. ("MIA Inc."). On November 30, 2010, pursuant to a corporate reorganization that involved no change of control or personnel during to account composite management, all composite accounts managed by MIA Inc. were transferred to MIA and performance information for periods prior to December 1, 2010 refer to this composite as managed by MIA Inc. During the first quarter of 2013, MIA and its parent company, MAM (also a registered investment adviser), began the process of eliminating the distinction between accounts and products managed by the two companies. Because MIA and MAM share all resources and personnel at their mutual Wisconsin office location and because there is no longer a brand or line of business distinction between products and services offered by the two registered investment advisers, for periods after March 31, 2013, the collective definition of the firm (Madison) includes accounts and assets managed by MAM and MIA. However, the firm does not claim compliance with the GIPS standards for assets and accounts managed by MAM prior to April 1, 2013. As of December 31, 2013, Madison Scottsdale, LC ("Scottsdale"), another registered investment adviser under common control with MIA, merged its assets into, and became part of, MIA and subsequently those assets became part of the firm (Madison). The transaction resulted in no change to the resources or personnel as the sole purpose of this change was to simplify Madison's legal corporate structure. Prior to January 1, 2014, Scottsdale did not claim GIPS compliance and no performance for composites formally maintained by Scottsdale are contained in this performance presentation or included in the definition of the firm (Madison). As of October 30, 2020, Hansberger Growth Investors, LP ("HGI LP"), an affiliated registered investment adviser under common control with MIA, consolidated its assets into MIA, and subsequently those assets became part of the firm (Madison). The transaction resulted in no change to the resources or personnel as the sole purpose of this change was to simplify the legal corporate structure. Prior to October 30, 2020, HGI LP claimed GIPS® compliance and all composite accounts managed by HGI LP were transferred to MIA and performance information for periods prior to October 30, 2020 refer to those composites as managed by HGI LP. On June 11, 2021, Madison acquired the fixed income management assets of Reinhart Partners, Inc. ("Reinhart"), an unaffiliated registered investment adviser, and subsequently those assets became part of the firm (Madison). The Investment Team of Reinhart, who were responsible for composite performance prior to June 11, 2021, joined Madison on that date and continue to manage the Reinhart Fixed Income Strategies. A list of composite descriptions and a list of broad distribution pooled funds are available upon request.

Madison claims compliance with the Global Investment Performance Standards (GIPS®) and has prepared and presented this report in compliance with the GIPS standards. The firm, as defined above, has been independently verified for the periods January 1, 1991 through December 31, 2025. A copy of the verification report is available upon request. A firm that claims compliance with the GIPS standards must establish policies and procedures for complying with all the applicable requirements of the GIPS standards. Verification provides assurance on whether the firm's policies and procedures related to composite and pooled fund maintenance, as well as the calculation, presentation, and distribution of performance, have been designed in compliance with the GIPS standards and have been implemented on a firm-wide basis. Verification does not provide assurance on the accuracy of any specific performance report. GIPS® is a registered trademark of CFA Institute. CFA Institute does not endorse or promote this organization, nor does it warrant the accuracy or quality of the content contained herein.

Results are based on fully discretionary accounts under management, including those accounts no longer with the firm. Composite policy requires the temporary removal of any portfolio incurring a client-initiated significant cash inflow or outflow of greater than 75% of portfolio assets for the period. Past performance is not indicative of future results.

The U.S. Dollar is the currency used to express performance. Time-weighted returns are presented gross and net of management fees and include the reinvestment of all income. For non-bundled fee accounts, the gross returns are stated gross of all fees and have been reduced by transaction costs. For bundled fee accounts, pure gross returns are shown as supplemental information and are stated gross of all fees and have not been reduced by transaction costs. Net returns are reduced by three separate annual model fees. The first net return is reduced by an annual non-bundled model fee which represents the standard fee: 0.20%, applied quarterly for periods prior to January 1, 2022 and applied monthly for periods beginning January 1, 2022. The second and third net returns are reduced by two annual bundled model fees of 1.25% and 3.00%, applied quarterly for periods prior to January 1, 2022 and applied monthly for periods beginning January 1, 2022. Due to variances between wrap/UMA programs, multiple net returns are presented to show three possible outcomes at different total annual fee rates. Bundled fees include Madison's portfolio management fee, as well as all charges for trading costs, custody, other administrative fees and any third-party manager fees. Bundled fee accounts made up 0% of the composite for all periods shown prior to September 1, 2022. Actual returns may vary depending on a particular account's trading platform and trading discretion. Any differences in the timing of trades may result in various performance outcomes for Madison's separately managed accounts versus model manager accounts. Actual returns will be reduced by investment advisory fees and other expenses that may be incurred in the management of the account. The collection of fees produces a compounding effect on the total rate of return net of management fees. As an example, the effect of investment management fees on the total value of a client's portfolio assuming (a) quarterly fee assessment, (b) \$1,000,000 investment, (c) portfolio return of 8% a year, and (d) 1.00% annual investment advisory fee would be \$10,416 in the first year, and cumulative effects of \$59,816 over five years and \$143,430 over ten years. The annual composite dispersion presented is an equal-weighted standard deviation calculated using the annual gross returns of the accounts in the composite for the entire year. The three-year annualized ex-post standard deviation of both the composite (using monthly gross returns) and the benchmark are required to be presented for year-end periods beginning in 2011. Policies for valuing investments, calculating performance, and preparing GIPS Reports are available upon request.

The management fee schedule is as follows: 0.20% annually on all assets. Total annual bundled fees charged by wrap/UMA sponsors familiar to Madison are generally in the range of 1.00% to 3.00% annually. Bundled fee schedules are provided by independent wrap/UMA program sponsors and are available upon request from the respective wrap/UMA sponsor. Actual investment advisory fees incurred by clients may vary. Additional information regarding investment advisory fees are described in our disclosure brochure.

The 1-5 Year Corporate Bond Ladder Composite was created October 1, 2014, and the inception date is October 1, 2014.

MADISON CORPORATE BOND LADDER 1-10 YEAR

March 31, 2026 | Separately Managed Account Performance & Characteristics

Portfolio Characteristics may help you understand how the portfolio, taken as a whole, is situated relative to other portfolios or the benchmark. See the Definitions section on the following page for more details about each metric presented below.

Investment Principles

- Provides a steady stream of income.
- Investment grade rated bonds; no derivatives.
- Transparency of holdings that typically target issuances of \$500 million or more.
- Leverages Madison’s dedicated credit research process, internal credit ratings, and proprietary Corporate Bond Spread analysis.

Investment Process & Philosophy

Madison’s Corporate Bond Ladders are constructed by purchasing a series of investment grade corporate bond issues with staggered maturities. The illustration below demonstrates that as bonds mature, the proceeds are reinvested to purchase new issues at the longer-end of the maturity structure. If interest rates rise, the ladders allow for clients to gain higher yields with reinvestment of maturing securities.

Madison’s ladder portfolios are constructed by a combination of top-down macroeconomic outlook, sector valuation and in-depth credit analysis by our highly experienced team. We only purchase investment grade bonds from quality companies and each issuer is selected with an eye towards liquidity. All portfolios are fully transparent; clients can see their exact holdings.

Madison monitors the credit of all bonds in the ladder portfolio and evaluates possible transactions in the event of a bond’s credit deterioration. As a result, Madison’s higher quality bias and sector screening play an important role in potentially mitigating occurrences of credit deterioration and untimely transactions in the portfolio.

DISCLOSURES & DEFINITIONS

1. Information is based on a model portfolio which is intended to provide a general illustration of the investment strategy. Individual client portfolios in the program may vary.
2. This measure is not the result of an assessment of the credit quality of the composite's portfolio by a Nationally Recognized Statistical Rating Agency ("NRSRO") or any other independent entity.
3. Credit quality ratings on underlying securities of the composite are received from one or more NRSRO (e.g., S&P, Moody's, Fitch, etc.) and converted to the equivalent major rating category commonly utilized by more than one NRSRO. The quality ratings are calculated by Madison and in the event of split ratings among the NRSROs, the highest rating is used. Ratings and portfolio credit quality may change over time. Portfolio distributions are rounded to the nearest 0.1%.

All or some of the information presented is "supplemental information" and is included as part of the GIPS® Report for the 1-10 Year Corporate Bond Ladder Composite on the reverse side, which must be included with this material. References to "Madison" are of a sample portfolio which represents hypothetical information based on a Madison model and does not reflect information of an account in the composite. It is not intended to reflect information of any individual account, and is presented for illustrative purposes only. Holdings may vary depending on account inception date, objective and other variables, including changes made to the model by the Advisor and sponsor. Past performance is no guarantee of future results. Individual client accounts may vary depending on time of investment. GIPS® is a registered trademark of CFA Institute. CFA Institute does not endorse or promote this organization, nor does it warrant the accuracy or quality of the content contained herein.

Risk:
All investing involves risks including the possible risk of principal. There can be no assurance the portfolios will achieve their investment objectives. In addition to the ongoing market risk applicable to portfolio securities, bonds are subject to interest rate risk. When interest rates rise, bond prices fall; generally, the longer a bond's maturity, the more sensitive it is to this risk. There may be less opportunity for price appreciation in a low interest rate environment. Bonds may also be subject to call risk, which allows the issuer to retain the right to redeem the debt, fully or partially, before the scheduled maturity date. Proceeds from sales prior to maturity may be more or less than originally invested due to changes in market conditions or changes in the credit quality of the issuer.

Please consult with your financial advisor to determine your risk tolerance and investment objectives.

It should not be assumed that recommendations made in the future will be profitable or will equal the performance of the securities in this list.

Holdings may vary depending on account inception date, objective, cash flows, market volatility, and other variables. Any securities identified and described herein do not represent all of the securities purchased or sold, and these securities may not be purchased for a new account. There is no guarantee that any securities transactions identified and described herein were, or will be profitable. Any securities identified and described herein are not a recommendation to buy or sell, and is not a solicitation for brokerage services.

Upon request, Madison may furnish to the client or institution a list of all security recommendations made within the past year.

Definitions:

Effective Duration: a measure of a portfolio's interest-rate sensitivity. The longer a portfolio's duration, the more sensitive the portfolio is to shifts in interest rates.

Weighted Average Maturity: computed by weighting the maturity of each security in the portfolio by the market value of the security, then averaging these weighted figures.

Weighted Average Quality: see footnotes 2 & 3 above.

Yield to Worst the lowest potential yield that can be received on a bond without the issuer actually defaulting. The yield to worst is calculated by making worst case scenario assumptions on the issue by calculating the returns that would be received if provisions, including prepayment, call or sinking fund, are used by the issuer.

Average Coupon: a fixed-income security's coupon rate is the annual coupon payments paid by the issuer relative to the bond's face or par value.

"Madison" and/or "Madison Investments" is the unifying tradename of Madison Investment Holdings, Inc., Madison Asset Management, LLC ("MAM"), and Madison Investment Advisors, LLC ("MIA"). MAM and MIA are registered as investment advisers with the U.S. Securities and Exchange Commission. Madison Funds are distributed by MFD Distributor, LLC. MFD Distributor, LLC is registered with the U.S. Securities and Exchange Commission as a broker-dealer and is a member firm of the Financial Industry Regulatory Authority. The home office for each firm listed above is 550 Science Drive, Madison, WI 53711. Madison's toll-free number is 800-767-0300.

Any performance data shown represents past performance. Past performance is no guarantee of future results.

Non-deposit investment products are not federally insured, involve investment risk, may lose value and are not obligations of, or guaranteed by, any financial institution. Investment returns and principal value will fluctuate.

This report is for informational purposes only and is not intended as an offer or solicitation with respect to the purchase or sale of any security and is not investment advice.

N/A - Information is not statistically meaningful due to an insufficient number of portfolios in the composite for the entire year.

As of December 31, 2025, total assets under advisement in all corporate bond ladder strategies, (1-3 Year, 1-5 Year and 1-10 Year), are \$1,300 million encompassing bundled fee accounts, non-bundled fee accounts and non-discretionary accounts which include \$884 million in model-traded assets. This is presented as supplemental information.

1-10 Year Corporate Bond Ladder Composite contains fully discretionary corporate bond non-bundled and bundled fee accounts. The strategy is focused on high quality security selection and designed to be a buy and hold strategy with continual credit monitoring and analysis. The principal objectives are preservation of invested capital and to provide a steady income stream derived from a laddered portfolio consisting of bonds issued by United States corporations with an average quality of investment grade that have a maturity of 10.5 years or less. Effective March 1, 2017, the composite was redefined to reflect the industry standard practice referring to the overall quality of the portfolio. Prior to March 1, 2017, the composite definition stated that a laddered portfolio should consist of investment-grade bonds issued by United States corporations that have a maturity of 10.5 years or less. The principal risks of investing in the portfolio include: interest rate risk, call risk, risk of default and liquidity risk. As interest rates rise, the prices of bonds fall. Long-term bonds are more exposed to interest-rate risk than short-term bonds. Unlike bonds, bond portfolios have ongoing fees and expenses. In a low-interest environment, there may be less opportunity for price appreciation. Effective December 18, 2017, for illustrative purposes the composite is compared to the ICE BofA 1-10 Year US Treasury TR Index (Index) which is an unmanaged index that tracks the performance of US Treasury securities with a maturity of 1-10 years. Prior to December 18, 2017, these two benchmarks were presented for illustrative purposes: the Bloomberg Intermediate A US Corporate Index (Index1) which measures the universe of US dollar denominated corporate debt with an A or better rating and a maturity of 10 years or less; and the ICE BofA US 3-Month Treasury Bill Index (Index2) which measures the performance of a single issue maturing close to (but not beyond) three months which is incorporated into the index at the beginning of the month and held for a full month. The presented indices were changed retroactively because the current index is a more appropriate representation of the strategy as it captures its focus on total return and a specific maturity horizon. The former benchmarks were provided to disclose market conditions during the periods and were as follows: 2016 – Index1=2.95% & Index2=0.33%; 2015 – Index1=1.83% & Index2=0.05%; 2014 (10/1-12/31) – Index1=1.13% & Index2=0.00%. The composite does not manage to, and does not have the goal of outperforming, a benchmark, as the use of relative performance criteria is not applicable for laddered portfolios. Effective February 1, 2023, the composite was redefined to begin including both non-bundled and bundled fee accounts.

For the purposes of GIPS compliance and the determination of total assets under management, the Firm is defined as Madison. Madison represents Madison Investment Advisors, LLC ("MIA") and Madison Asset Management, LLC ("MAM"), two investment advisers under common control registered with the U.S. Securities and Exchange Commission pursuant to the Investment Advisers Act of 1940. (Registration does not imply a certain level of skill or training.) Prior to December 1, 2010, the Firm's composites were maintained by Madison Investment Advisors, Inc. ("MIA Inc."). On November 30, 2010, pursuant to a corporate reorganization that involved no change of control or personnel relating to account composite management, all composite accounts managed by MIA Inc. were transferred to MIA and performance information for periods prior to December 1, 2010 refer to this composite as managed by MIA Inc. During the first quarter of 2013, MIA and its parent company, MAM (also a registered investment adviser), began the process of eliminating the distinction between accounts and products managed by the two companies. Because MIA and MAM share all resources and personnel at their mutual Wisconsin office location and because there is no longer a brand or line of business distinction between products and services offered by the two registered investment advisers, for periods after March 31, 2013, the collective definition of the firm (Madison) includes accounts and assets managed by MAM and MIA. However, the firm does not claim compliance with the GIPS standards for assets and accounts managed by MAM prior to April 1, 2013. As of December 31, 2013, Madison Scottsdale, LLC ("Scottsdale"), another registered investment adviser under common control with MIA, merged its assets into, and became part of, MIA and subsequently those assets became part of the firm (Madison). The transaction resulted in no change to the resources or personnel as the sole purpose of this change was to simplify Madison's legal corporate structure. Prior to January 1, 2014, Scottsdale did not claim GIPS compliance and no performance for composites formally maintained by Scottsdale are contained in this performance presentation or included in the definition of the firm (Madison). As of October 30, 2020, Hansberger Growth Investors, LP ("HGI LP"), an affiliated registered investment adviser under common control with MIA, consolidated its assets into MIA, and subsequently those assets became part of the firm (Madison). The transaction resulted in no change to the resources or personnel as the sole purpose of this change was to simplify the legal corporate structure. Prior to October 30, 2020, HGI LP claimed GIPS® compliance and all composite accounts managed by HGI LP were transferred to MIA and performance information for periods prior to October 30, 2020 refer to those composites as managed by HGI LP. On June 11, 2021, Madison acquired the fixed income management assets of Reinhart Partners, Inc. ("Reinhart"), an unaffiliated registered investment adviser, and subsequently those assets became part of the firm (Madison). The Investment Team of Reinhart, who were responsible for composite performance prior to June 11, 2021, joined Madison on that date and continue to manage the Reinhart Fixed Income Strategies. A list of composite descriptions and a list of broad distribution pooled funds are available upon request.

Madison claims compliance with the Global Investment Performance Standards (GIPS®) and has prepared and presented this report in compliance with the GIPS standards. The firm, as defined above, has been independently verified for the periods January 1, 1991 through December 31, 2025. A copy of the verification report is available upon request. A firm that claims compliance with the GIPS standards must establish policies and procedures for complying with all the applicable requirements of the GIPS standards. Verification provides assurance on whether the firm's policies and procedures related to composite and pooled fund maintenance, as well as the calculation, presentation, and distribution of performance, have been designed in compliance with the GIPS standards and have been implemented on a firm-wide basis. Verification does not provide assurance on the accuracy of any specific performance report. GIPS® is a registered trademark of CFA Institute. CFA Institute does not endorse or promote this organization, nor does it warrant the accuracy or quality of the content contained herein.

Results are based on fully discretionary accounts under management, including those accounts no longer with the firm. Composite policy requires the temporary removal of any portfolio incurring a client-initiated significant cash inflow or outflow of greater than 75% of portfolio assets for the period. Past performance is not indicative of future results.

The U.S. Dollar is the currency used to express performance. Time-weighted returns are presented gross and net of management fees and include the reinvestment of all income. For non-bundled fee accounts, the gross returns are stated gross of all fees and have been reduced by transaction costs. For bundled fee accounts, pure gross returns are shown as supplemental information and are stated gross of all fees and have not been reduced by transaction costs. Net returns are reduced by three separate annual model fees. The first net return is reduced by an annual non-bundled model fee which represents the standard fee: 0.20%, applied quarterly for periods prior to January 1, 2022 and applied monthly for periods beginning January 1, 2022. The second and third net returns are reduced by two annual bundled model fees of 1.25% and 3.00%, applied quarterly for periods prior to January 1, 2022 and applied monthly for periods beginning January 1, 2022. Due to variances between wrap/UMA programs, multiple net returns are presented to show three possible outcomes at different total annual fee rates. Bundled fees include Madison's portfolio management fee, as well as all charges for trading costs, custody, other administrative fees and any third-party manager fees. Bundled fee accounts made up 0% of the composite for all periods shown prior to February 1, 2023. Actual returns may vary depending on a particular account's trading platform and trading discretion. Any differences in the timing of trades may result in various performance outcomes for Madison's separately managed accounts versus model manager accounts. Actual returns will be reduced by investment advisory fees and other expenses that may be incurred in the management of the account. The collection of fees produces a compounding effect on the total rate of return net of management fees. As an example, the effect of investment management fees on the total value of a client's portfolio assuming (a) quarterly fee assessment, (b) \$1,000,000 investment, (c) portfolio return of 8% a year, and (d) 1.00% annual investment advisory fee would be \$10,416 in the first year, and cumulative effects of \$59,816 over five years and \$143,430 over ten years. The annual composite dispersion presented is an equal-weighted standard deviation calculated using the annual gross returns of the accounts in the composite for the entire year. The three-year annualized ex-post standard deviation of both the composite (using monthly gross returns) and the benchmark are required to be presented for year-end periods beginning in 2011. Policies for valuing investments, calculating performance, and preparing GIPS Reports are available upon request.

The management fee schedule is as follows: 0.20% annually on all assets. Total annual bundled fees charged by wrap/UMA sponsors familiar to Madison are generally in the range of 1.00% to 3.00% annually. Bundled fee schedules are provided by independent wrap/UMA program sponsors and are available upon request from the respective wrap/UMA sponsor. Actual investment advisory fees incurred by clients may vary. Additional information regarding investment advisory fees are described in our disclosure brochure.

The 1-10 Year Corporate Bond Ladder Composite was created October 1, 2014, and the inception date is October 1, 2014.
